RAGHD ANAAM

Software Engineer | Full-Stack Development, AI & Data

Kuala Lumpur, Malaysia | +6017 224 9600 | raghdanaam@gmail.com | Github | LinkedIn

PROFESSIONAL SUMMARY

Software Engineering graduate with First Class Honours and experience in software development, test automation, AI, and computer vision. Built and deployed full-stack applications using Python, Flask, Vue.js, React, TensorFlow/Keras, and OpenCV.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, PHP, C++, C#
Frameworks: Next.js, React, Vue.js, Flask, Laravel, GraphQL
Databases: MySQL, SQLite, PostgreSQL (Neon), Firebase Realtime Database
AI / Computer Vision: TensorFlow, Keras, OpenCV, Replicate API
Testing & QA: Selenium, Cucumber, Appium, Android SDK
Tools & Practices: Git, Bitbucket, Jira, Docker, Agile/Scrum, REST APIs, MVC, CRUD, RBAC
Data & Mobile: Tableau, Python (pandas/NumPy), .NET MAUI

EXPERIENCE

Software Engineer Intern - SICPA Product Security Sdn. Bhd. *Jul 2024 - Sep 2024*

- Automated execution and analysis of mobile app test cases using Selenium, Cucumber, and Appium, reducing manual regression-testing effort for the QA team within an Agile/Scrum workflow.
- Diagnosed and resolved recurring test failures across device connectivity, build, and configuration issues, improving the reliability of the automation suite.
- Gained exposure to Java/Spring Boot and mobile application code while coordinated task tracking and version control via Jira and Bitbucket; placed 2nd in the SICPA Hackathon by helping modernize a legacy application under time constraints.

PROJECTS

SkinVision - AI-Powered Skincare Progress Tracker

Live demo: SkinVision

- Built a full-stack AI app for facial image analysis, age prediction, and skin condition tracking using TensorFlow/Keras (EfficientNet) and OpenCV, trained on 23,708 images.
- Developed a Flask backend and Vue.js frontend with SQLite, including a dashboard visualizing skin condition and age-related trends over time.

Roomly - AI-Powered Interior Design App

Live demo: Roomly

- Built a full-stack AI interior design SaaS using Next.js, React, and JavaScript, with Tailwind CSS/Shadcn UI, Clerk authentication, and Drizzle ORM with Neon PostgreSQL.
- Integrated the Replicate API to transform room photos by design theme, with Cloudinary for image storage and a PayPal credit-based payment system.

Research Grant System

Demo video: Watch Demo

- Built a Laravel/PHP/MySQL system to manage grant applications, project teams, and milestones, with role-based access control and full CRUD.

BalanceIt - Budget and Expense Tracking App

Demo video: Watch demo

- Built a cross-platform mobile app (.NET MAUI, C#) with Firebase Realtime Database for tracking income, expenses, budgets, and summaries.

Energy Consumption Analytics Dashboard (Tableau)

Demo video: Watch demo

- Cleaned and structured datasets, then built interactive Tableau dashboards analyzing consumption patterns and peak usage periods.

EDUCATION

Bachelor of Computer Science (Software Engineering Hons.) *Feb 2022 - Jul 2025*

- Universiti Tenaga Nasional (UNITEN) - CGPA: 3.89/4.00, First Class Honours, Dean's List

Foundation of Science *Dec 2020 - Nov 2021*

- Xiamen University Malaysia

CERTIFICATIONS & ACHIEVEMENTS

- Silver Award, Invention, Innovation & Design Exposition (2021)
- 2nd Place, SICPA Hackathon (2024)
- Data Analysis with Python - freeCodeCamp View certificate
